

From left to right: Metallica's Europe tour - New York Knicks Pre-Game Show - "Fantastic Journey" for Princess Cruises' new ship

HARDWARE / ELECTRONICS DESIGN INTERNSHIP

Verity Studios delivers ground-breaking drone show systems that are purpose-built for the live entertainment and events industry. Its show drones have been featured in a variety of live events, including PARAMOUR, the Broadway show by Cirque du Soleil, Metallica's current arena tour, and at every New York Knicks pre-game show at Madison Square Garden. The unique performance capabilities of show drones provide a stunning complement to the traditional palette of light, sound, stage effects, and human performance. We are excited about using technology to transform live entertainment and other industries, and we are growing our team.

Internships may begin at any time during the year. Interns are expected to work a minimum of six months.

YOUR TASKS

- Design and development of PCB's with digital, analog, power, sensors, and RF
- Circuit design, analysis, and real-world verification - on the lab bench and in the air
- Hands-on involvement in all stages of prototype and product development
